PRODUCTS OR MACHINERY

Magic? No, technology

Known by few, but admired by many. For more than three thousand years the art of glass making has been a dream, a form of imagination, a treasured secret. A transparent vision of life from one of the most precious gifts of nature.

Glass is a form of life. It is remarkable, flexible and can be transformed a thousand times over. A material that keeps on living.

An art where our ambitions can be explored, a prestigious form of design, an object of desire that is constantly challenged by architects and designers, or simply by those who dream of a world of its light and reflections. Glass in all shapes and sizes, cut, painted, sandblasted, laminated, matched, glued and combined with other materials and then finally folded, bent and modelled as required in any way possible, or even impossible. Glass making as known by a small selection of European master craftsmen.
