### Popular Sinclair Glass Profiles

Sinclair Glass professionals have the experience and capability to produce the finest bent glass in the industry. We are known for our diversity, quality and wide array of capabilities in glass bending. Bent glass can take on many shapes and applications. Common types of glass bends include a simple radius, "J" curve, serpentine, and double serpentine often seen in furniture or display cases. There are also various shapes for lighting and industrial applications including bowls, cones, bells, half cylinders and half-bowls. Sinclair is a leading supplier of slumped and tempered lenses for parking lot and outdoor lighting lenses commonly called "sag lenses". Sinclair also has the capability to produce custom unique shapes and bends utilizing specialty made molds. There are many variations of each of these curves that we can create. Please contact us for a quote or more information.
