PRODUCTS OR MACHINERY

Nepheline syenite, silica content (59-60 %) , alumina (Al_2O_3 22-26%) and alkali (8-10% Na_2O , 5-7 % K_2O).

Feldspar and nepheline syenite are still the biggest consumer of the glass industry. Feldspathic minerals contribute to glass batch mainly in the form of a source of alumina. However diluent (flux) properties are also useful. Alkali feldspar serves as flux to reduce the melting temperature.

Company Profile of **B&S Yatirim A. S.**

A service of glasssglobal.com, an affiliate of glasssglobal group.
