The Web Ranger is an optical surface inspection and defect classification system that provides a total quality solution for products produced in continuous webs.

OA powerful classification engine quickly and accurately sorts the defects into user-defined categories to aid in production quality control and process improvement.

All defect data can be viewed in real time and is also stored in a comprehensive database for subsequent review, analysis, reporting and archiving.

With easy to use tools, system setup is simple and fast. The result: higher product quality, better yields and lower costs of production.
