PRODUCTS OR MACHINERY

We not only develop diagnostic tools because we love technology. Since 1995, the name „mega macs“ has been standing for intelligent and straightforward support of the repair work above all with a practical orientation.

Since that time we have been set ourselves the task to facilitate and to improve the daily work in the car workshops with every new tool generation. The most important reason for that is the increasing complexity of the different vehicle systems. This is our standard both for the development of new tools and for the expansion of the Hella Gutmann service packages.

Only solutions which contribute to your success are worth being realised
