## PRODUCTS OR MACHINERY

Manufacturer of E glass fiber products for reinforcement of thermoplastics and thermosets-roving, chopped strand, chopped stand mat. Also glass tissue (fleece), polyester resins

Cam Elyaf produces its own chopped strand mat in house. Chopped strand mats require a secondary binder to provide mat integrity and Cam Elyaf produces mats with two different kinds of secondary binders. Mats with a powder binder offer high stiffness and excellent styrene solubility, while mats with an emulsion binder show high mechanical properties and excellent drapability. The latter are commonly used in boat hulls as internal laminates sandwiched between two layers of glass fibre textiles.

### Company Profile of **Şişecam Glass Fibre**

A service of glasssglobal.com, an affiliate of glasssglobal group.
