Country	Mexico

PRODUCTS OR MACHINERY

Today Saverglass is the leading global player in the market for Premium and Super Premium bottles. Its production tool and expertise are used to manage significant volumes of orders while meeting the specific needs of its customers for special and short runs.

This technological expertise, the quality of its services and its capacity for creation place Saverglass in a unique position on the market.

The Mexican unit will produce bottles for tequila, wine and rum and produce bottles in a variety of colours and has an envisaged capacity of approx. 80 million bottles a year. The remarkable machine has been supplemented by a whole range of decorative processes, in which Saverglass is an expert, namely: automatic or semi-automatic screen printing using organic inks, enamel, or precious metals, allowing bottles and decanters to be intricately decorated; organic coatings (opaque or translucent); hot stamping; and, from next year, frosted finishes.

The group will focus on three markets: American wines, tequila and the rum market in the Caribbean and Central America.
