

The study is accessible with all devices, PC's, notebooks, tablets and mobile phones. In order to improve the comfort of the study when traveling, we have developed the "Around Me" feature.

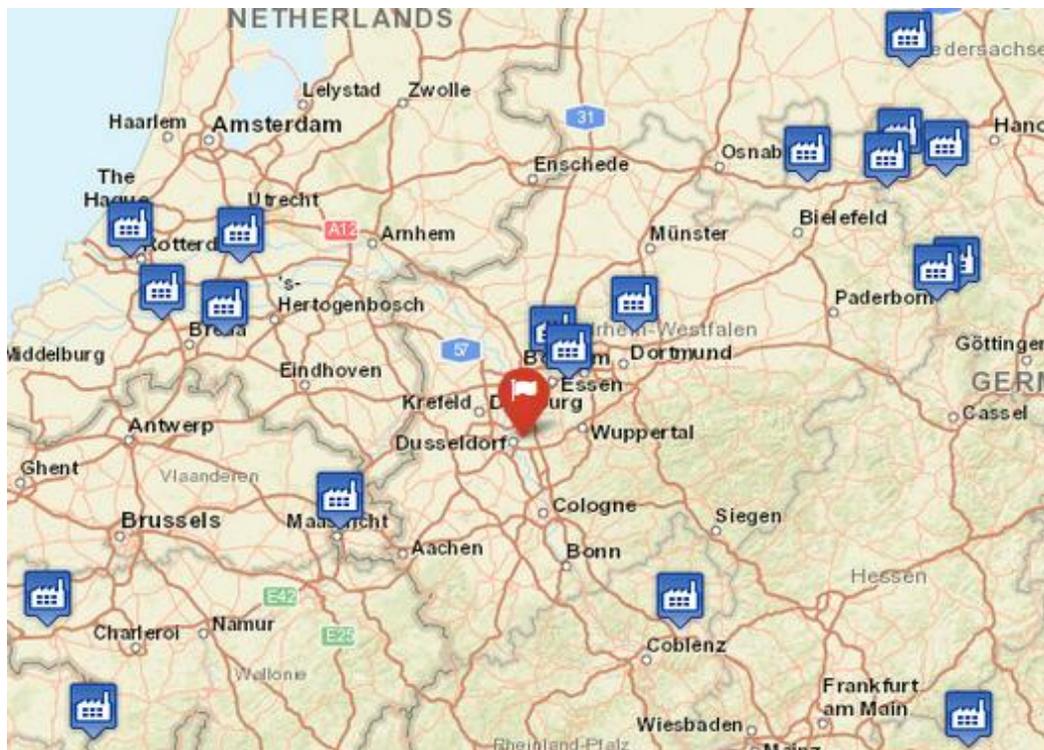

Select a target group with the filter in the chapter "Furnaces" and a distance from either your company or your current location. The selection from your current location works with your mobile phone (positioning of your device required) or e.g. with your notebook in a hotel.

Picture 1: Around Me settings, distances selectable from 50km to 500km

On the homepage of the study, before login, you find a short video with sound recording, introducing the Around Me feature with an example.

The study shows the glass plants of your target group as a table or in a map - ideal for the evaluation of an itinerary at a glance.

Picture 2: Map with symbols for your own location and glass factories in a selected distance

**Glass experts are ready for a guided tour through the study. Agree your appointment at:
Telephone +49 211 2807330 or sales@glassglobal.com**
