Address	Satinal Spa Via del Lavoro 1 22036 Erba - Como
Country	Italy

PRODUCTS OR MACHINERY

Chemical products and machines for frosting/etching on hollow glass (bottles for spirits, cosmetics, tableware, lighting) and flat glass.

SATINAL is a product of our own formulation and manufacture, composed of a balanced mixture of selected ground and blended inorganic salts that, when dissolved in hydrofluoric or hydrochloric acid, forms a solution able to produce fine quality surface etching on glass sheets, containers for cosmetics, lighting systems and glassware. The result is a white and uniform frosting finishing on glass surface, soft and pleasing to the touch.

Satinal "Flat Glass"

This kind of SATINAL is an etching/frosting powder indicated for the etching/frosting of flat/float glass sheets (clear, extraclear, coloured, mirror, coloured mirror) and gives a covering uniform etching finishing. It is a frosting powder particularly suitable for the use with hydrofluoric acid.

Company Profile of **Satinal Spa**

A service of glasssglobal.com, an affiliate of glasssglobal group.
