PRODUCTS OR MACHINERY

Innovative technologies for glass processing equipment:

Our understanding of the glass production processes and our intimacy with major glassmakers enables us to develop technologies and equipment answering our customers' needs in terms of glass quality and operational performance. Our innovation aims at offering to our customers:

- Low energy consumption,
- Ultimate glass quality,
- Easy operation and maintenance,
- Optimized investment cost.

Our experience in a wide range of glass applications enable us to combine technologies to serve the most demanding glass applications such as Automotive, Architectural, Ultra-thin, Container, Pharmaceuticals, Perfume, Fibre, Crystal, high-alumina touch screen glass and many other special glass processes.

The company's services and proprietary glass production equipment include:

- Design & Engineering
- Proprietary design and Procurement
- Complete Project and Construction Management
- Start-up of the plant with on-site plant production assistance

A team to providing the best Service level to its customers:

As a designer and supplier of machines, process equipment and production lines, Fives delivers complex machines and installations with significantly long lifecycle. In term of Service, the commitment and the strength of Fives is to fully assist and proactively help its clients to maximize the performance of their industrial installation during operation.

In that way, Fives offers pioneering, valuable and high quality service solutions in order to help its client operate, optimize and evolve their production goods.

We believe that understanding our client's operations is the best way to offer them customized Service Solutions that will increase their return on-investment.

Fives Service offers:

Operation
